## Business Analyst / Data Analyst

[Portfolio](#) | [LinkedIn](#)

Bilingual, self-taught, attentive to details, and with a smooth adaptation to changes. I specialize in integrating diverse sources of information and communicating results through interactive dashboards using Tableau, SQL, and Python. I have experience in the pharmaceutical, health, and retail industries. Currently, I am looking to join a team that allows me to grow professionally in a collaborative work environment

## Skills

- SQL (MySQL, PostgreSQL)
- Python & R
- Tableau & Looker Studio
- Excel , DAX

## Professional Experience

### Freelance Data Analyst /Consultant | Ekhos | *Feb 2024- Now*

- Lead Python automation projects for report generation.
- Provide expert advice on data visualization techniques.
- Mentor junior practitioners to support their professional development

### SQL Instructor | NivelUP Chile | *Nov 2023- Now*

Conduct training sessions that provide essential SQL skills through a solid theoretical and practical foundation for beginners and intermediate level.

### BI/Data Analyst | Almacenes Digitales Startup | *Feb. 2023 - Oct 2023*

- Designed dashboards in Tableau and communicated results to representatives of leading brands in national food supply (e.g., Soprole, Watts, and Nestlé). This achievement played a key role in acquiring our first clients.
- Developed and optimized ad-hoc SQL queries for multiple requirement, improving response times by up to 60%.
- Automated standardized reports for clients, including analysis of price perception surveys using Excel/Python and Tableau.

### Data Scientist Intern | Kibernetum | *Sep. 2022 - Dic 2022*

I transformed data and developed clusterization machine learning models in Python to determine the variables with the greatest impact on the business model according to customer types. Thanks to our project, more resources were allocated to strategic areas.
